

TRADE STATISTICS BULLETIN

1 JULY 2008 to 30 April 2009

TRADE HIGHLIGHTS

- Total trade for the financial year to 30 April 2009 was 23.5 million mass tonnes — a decrease of 3.5% compared to the same period last year. This was mainly as a result of the cessation of the motor vehicle trade through Glebe Island in November 2008 and the reduction in crude oil imports.
- Non-containerised trade was 11.3 million mass tonnes (representing 48.0% of total trade in mass tonnes). Containerised trade was 11.4 million mass tonnes (48.5% of total trade in mass tonnes). The balance (0.84 million mass tonnes) comprised empty containers (3.6% of total trade in mass tonnes).

** Total trade in mass tonnes terms comprises non-containerised trade and containerised trade (including empty containers) through Sydney's ports.*

CONTAINER TRADE

- Container trade performance for year to date (YTD) April 2008/09 was 1.52 million TEUs, up 2.7 % on the same period last year.
- April 2009 container trade reached 138,600 TEUs which was a decrease of 3.2% on the same period last year. Predominately impacting on this result is the decrease in the export of empty containers (-20.5%) and the lesser impact of a decline in the import of full containers during the month of April 2009 (-6.3%).
- Total full container imports for YTD April 2008/09 reached 748,600 TEUs, up 0.9% on the corresponding period last year. The leading import regions were dominated by East Asia (44%), Europe (17 %) and South East Asia (15%), which combined account for 76% of total full container imports through the ports of Sydney.
- Full container exports for YTD April 2008/09 reached 315,400 TEUs up 15.7% compared to the same period last year. The higher exports of timber, cereals, machinery and transport equipment and textile fabrics have been the primary drivers of the growth. Timber exports have outperformed other commodities for YTD April 2009/09, up 106% on the same period last year which was driven by increasing demand from China for Australian timber. The depreciation of the Australian Dollar has improved the competitive position of Australian firms, which has contributed to the higher exports.
- Exports of empty containers for YTD April 2008/09 decreased 5.9% compared to the same period last year, reaching 384,400 TEUs. Empty container exports performance is directly linked to the growth of full container imports. As such, the decrease of empty container exports through the ports of Sydney will continue when the movement in full container imports is lower than the movement in full container exports.

CONTAINERISED COMMODITIES

- Six of Sydney Ports' top ten imported containerised commodities in TEUs traded above the previous year's levels. The top imported commodities were headed by machinery and transport equipment, miscellaneous manufactures and chemical products, which combined represented 55.7% of all containerised goods imported through Sydney's ports.
- The leading containerised exports in TEUs through the ports of Sydney for YTD April 2008/09 were chemical products, machinery and transport equipment and miscellaneous manufactures.

NON-CONTAINERISED TRADE

- Non-containerised imports for YTD April 2008/09 decreased 8.2% compared to the corresponding period last year, to 10.7 million mass tonnes. This was due mainly to lower crude oil imports, which decreased 22.9% on the same period last year. However in contrast, refined oil imports increased by 36.3%.
- Non-containerised exports decreased 43.7% to 0.58m mass tonnes for YTD April 2009/09. This decrease was mainly attributable to reduced propane coastal and New Zealand exports and lower refined oil exports.

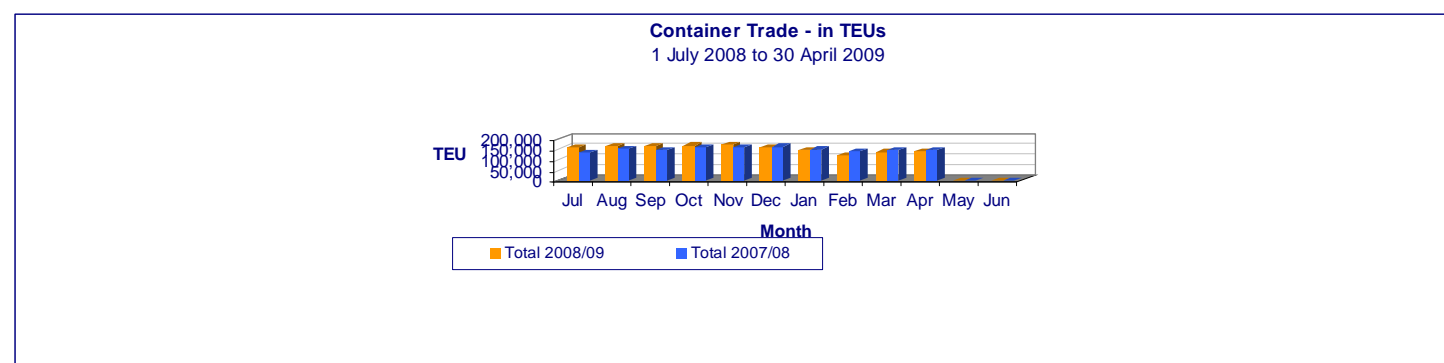

COMMODITY FOCUS BRIEF

- SPC Trade Report 2007/08, which provides detailed full year report, is available on our website for viewing and downloading. Please go to www.sydneyports.com.au to get your copy.
