

CHALLENGES

- » Undertaking organisational changes and restructure, to ensure Sydney Ports is in the best position for its role in the future.
- » Maintaining stringent environmental controls and endeavouring to meet community expectations, whilst undertaking complex construction works for the Port Botany Expansion project.
- » Development of our strategy to address impacts of climate change, in terms of understanding impacts on our assets and business and that of the wider port community.
- » Establishing our new role in management of logistics of the port, beyond our traditional port manager role, which has required detailed planning and close consultation with stakeholders to increase the efficiency of the port.
- » Going forward, the impacts of the global financial crisis will require constant attention and proactive management to ensure our sustainability.
