

TRADE STATISTICS BULLETIN

1 July 2009 – 31 December 2009

CONTAINER TRADE

- Container trade performance for year to date (YTD) December 2009/10 was 0.993 million TEUs, up 0.8% on the same period last year. The container throughput for the year to date 31 December 2009 experienced positive YoY growth for the first time since July 2009.
- December 2009 container trade reached 176,400 TEUs which was an increase of 10.7% on the same period last year. This is the highest container trade for the month of December in history. Predominately impacting on this result is the increase in imports of full containers (16.2%) and the lesser impact of an increase in the export of empty containers (11.2%) during the month of December 2009.
- Total full container imports for YTD December 2009/10 reached 496,200 TEUs, up 1.3% on the corresponding period last year. The leading import regions were dominated by East Asia (47%), South East Asia (15%) and Europe (14%), which combined account for 76% of total full container imports through the ports of Sydney.
- Full container exports for YTD December 2009/10 reached 223,300 TEUs up 0.4% compared to the same period last year. The higher exports of cereals, non-ferrous metals and waste paper have been the primary drivers of the growth. Cereal exports continue to have strong growth as a result of favourable growing conditions in the North West and Central West regions of the State, up 59.8% YTD December 2009/10 on the same period last year.
- Exports of empty containers for YTD December 2009/10 decreased 0.4% compared to the same period last year, reaching 261,000 TEUs. Empty container exports performance is directly linked to the strength of full container imports. As such, the decrease of empty container exports through the ports of Sydney will continue when the movement in full container imports is lower than the movement in full container exports.

CONTAINERISED COMMODITIES

- The top imported commodities were headed by, miscellaneous manufactures, machinery and transport equipment and chemical products, which combined represented 56.6% of all containerised goods imported through Sydney's ports.
- The leading containerised exports in TEUs through the ports of Sydney for YTD December 2009/10 were chemical products, cereals and machinery and transport equipment.

NON-CONTAINERISED TRADE

- Non-containerised imports for YTD December 2009/10 decreased 4.2% compared to the corresponding period last year, to 6.3 million mass tonnes. This was due mainly to refined oil imports which decreased by 17.8% and a decrease in propane imports of 24.9%. However the YTD December result for non-containerised imports was partially offset by crude oil imports which increased by 11.0% on the same period last year.
- Non-containerised exports decreased 22.5% to 287,600 mass tonnes for YTD December 2009/10. This decrease was mainly attributable to reduced propane coastal and New Zealand exports and lower refined oil exports.

TOTAL TRADE

- Total trade for the financial year to 31 December 2009 was 14.2 million mass tonnes — a decrease of 3.7% compared to the same period last year. This was mainly as a result of the cessation of the motor vehicle trade through Glebe Island in November 2008
- Non-containerised trade was 6.6 million mass tonnes (representing 46.7% of total trade in mass tonnes). Containerised trade was 7.0 million mass tonnes (49.3% of total trade in mass tonnes). The balance (0.6 million mass tonnes) comprised empty containers (4.0% of total trade in mass tonnes).
- * *Total trade in mass tonnes terms comprises non-containerised trade and containerised trade (including empty containers) through Sydney's ports.*
